Any help? A: Your error reporting seems to indicate that the USB port on the back of your car is bad. The car should be checked by an authorized repair center. There is some info here: Ross-Tech: This article is for assisting with the diagnostics required with a bad port on your vehicle. The above port is a known problem, caused by the internal wiring of your vehicle. Many vehicles will have a port on the back of your vehicle, just on the driver's side. To assist with diagnosing the port, the following steps are recommended: 2. Be sure the vehicle you are repairing is in park. 3. Turn off the ignition and switch the ignition back on. 4. Turn on the vehicle's headlights, if available. 5. Start the vehicle and slowly drive toward the front of the vehicle with all the doors unlocked. 6. If the problem does not occur immediately, drive all the way back to the rear of the vehicle. 7. If the problem persists, turn off the ignition and remove the key. Look at the cable located in the drivers

---

side kick panel. If the cable is visibly damaged, you need to replace it. If the cable appears to be working fine, you may have the wrong cable. 8. If necessary, replace the cable and try the car again. 9. If the car is still having a problem, there is a good chance your cable port is bad.

**BBC Newsnight** BBC Newsnight is a monthly evening programme produced by the BBC, presented by Kirsty Wark. The current host is Sophie Raworth, who has been interviewing celebrities and politicians since October 2017. The programme seeks to focus on the major political and societal issues of the day. It is broadcast on BBC One at 22:00 on Thursday evenings. The programme is often the BBC's highest rating programme at the time of transmission. It is available in the UK in the United Kingdom on the digital BBC iPlayer. History
